Delhi, India

Professional Summary

Aspiring Data Analyst with hands-on experience in Python, SQL, Excel, Tableau, and Power BI. Skilled in data cleaning, visualization, and statistical analysis. Seeking to drive business decisions through data-driven insights.

Education

B.Sc. (Data Analytics)

Delhi Skill and Entrepreneurship University, Dwarka, Delhi

Intermediate (PCM)

St. Charles inter college, Sardhana, Meerut

High School

St. Charles inter college, Sardhana, Meerut

Technical Skills

- **Tools & Technologies:** Excel (Advanced), Tableau, Power BI
- **Programming:** Python, SQL
- **Techniques:** Data Cleaning, Exploratory Data Analysis, Data Visualization, Statistical Analysis, Forecasting

Projects

- **Employee Layoffs Data Analysis**

Tools: MySQL

- Cleaned and transformed a dataset of over 5,000+ layoff records using SQL; resolved 100% of missing values, removed duplicates, and standardized inconsistent formats for accurate analysis.
- Derived layoff trends across 50+ companies and 10+ industries, using GROUP BY, JOIN, and filter queries to uncover patterns across time and sectors.

- **Netflix User Behaviour Dashboard**

Tools: Tableau, Excel

- Created interactive Tableau dashboards to evaluate 10,000+ Netflix user records, highlighting trends in watch time, device usage, and genre preferences.
- Delivered actionable insights that supported content strategy decisions by identifying top 5 most-watched genres and peak engagement hours.

- **Diabetes Prediction Dashboard**

Tools: Power BI

- Built an interactive Power BI dashboard using a dataset of 750+ patient records to visualize diabetes risk factors, prediction outcomes, and individual health metrics.
- Visualized key indicators such as glucose levels, BMI, age groups, and prediction results, enabling stakeholders to identify high-risk patients.

- **Car Price Prediction Model**

Tools: Pandas, Scikit-learn, Matplotlib

- Developed a linear regression model using Python to predict car prices based on 7+ key features including brand, year, fuel type, and transmission.
- Pre-processed a dataset of 1,500+ entries by handling null values, encoding categorical variables, and treating outliers, achieving a model accuracy of 70% (R^2 score).

Work Experience

- **Data Analyst Intern**

DataNStats Pvt. Ltd. – Internship | Feb 2024 – May 2024 (3 months)

- Automated data scraping using Python and Selenium, reducing manual work by 50%.
- Cleaned and transformed datasets using Pandas for client reporting.
- Find patterns in business data and collaborated with cross-functional teams.

- **Data Analyst Intern**

IKAAI INDIA Pvt. Ltd. – Internship | July 2023 (1 month)

- Pre-processed survey data and ensured high accuracy using SPSS and Excel.
- Built interactive dashboards in Tableau and Power BI for stakeholder insights.
- Supported statistical analysis for healthcare and social sector reports.

Achievements & Certifications

- Microsoft Power BI Data Analyst (PL-300) | Python for Data Analysis | Advanced Excel & Financial Calculations
- NSS Member in College | Hackathon Participation | NCC Cadet in School | Public Speaking & Debate Competition | Yoga | Badminton
